Broader Impact For Research and Discovery Summit

Broader Impacts for Research and Discovery Summit

Expected: June 21st to 23rd, 2010

This workshop is expected to present examples and develop materials to educate the **NSF CISE research community** about:

- **the five broader impacts criteria**
 1. advance science while promoting teaching, training and learning;
 2. broaden participation of underrepresented groups;
 3. enhance infrastructure for research and education;
 4. provide broad dissemination to enhance scientific and technological understanding, and
 5. highlight the benefit to society;
- **effective on-going activities that achieve broader impact, and**
- **the importance of these criteria to NSF funded research.**

ACM International Health Informatics Symposium (IHI 2010)

ACM is proud to sponsor a new conference, which is being planned to become the premier community forum for health informatics researchers and practitioners. The ACM International Health Informatics Symposium (IHI 2010) will focus on the application of computing principles and technology to address problems in healthcare, public health, the delivery of healthcare services, and consumer health also including topics related to social and ethical issues in that space. IHI 2010 will be held during November 11-12 in Washington DC. Technical contributions including papers and demonstration proposals are due on June 4. For more information, please visit <http://ihi2010.sighi.org>
