

# From the Editor's Desk

Martin C. Carlisle

Welcome to this month's issue of Ada Letters. We hope that you enjoy it and find it informative. This issue features information on reusable components for Ada, including articles on Charles (a precursor to the Ada 2005 component libraries), Stephe's Ada Library and the PragmAda reusable components. And no issue on reusable components would be complete without an update from a regular Ada Letters contributor, Trudy Levine.

Of interest to all Ada users and enthusiasts will be the forthcoming revision to the Ada language, Ada 2005. Inside you'll find information on SIGAda 2004 (November 14-18 in Atlanta) and Ada-Europe 2005 (20-24 June 2005 in York, UK). These conferences will be great opportunities to learn more about what will be in the new revision of the Ada language, and how implementations of Ada 2005 are progressing, as well as other research and industry uses of Ada.

Ada Letters would be a great place to submit articles on your experiences with the language revision, tips on how to do things with the new language features, as well as to describe success stories using Ada. We'll look forward to your submission. You can submit either a MS Word or Adobe PDF file (with 1" margins and no page numbers) to our technical editor:
