

Gtk Marries Ada: The GUI Technology Revolution

charlet@gnat.com

Overview

History of GtkAda

GtkAda Features

Why Gtk Rather Than Other Toolkits?

Why GtkAda rather than Gtk+?

GtkAda - History

- ✓ **The GIMP**
 - **GNU Photoshop clone**
- ✓ **The Gtk+ library**
 - **Becomes independent**
- ✓ **GtkGlade: a Gtk+ GUI builder**
- ✓ **Gnome: a desktop manager**
- ✓ **GVD: the GNU Visual Debugger**

GtkAda Features

- ✓ **High-level binding to the Gtk+ library**
 - **object-oriented**
 - **type safety**
 - **small and efficient**
- ✓ **Highly portable**
 - **Unixes: Linux, Solaris, ...**
 - **Windows NT**
- ✓ **Native**

GtkAda Features (2)

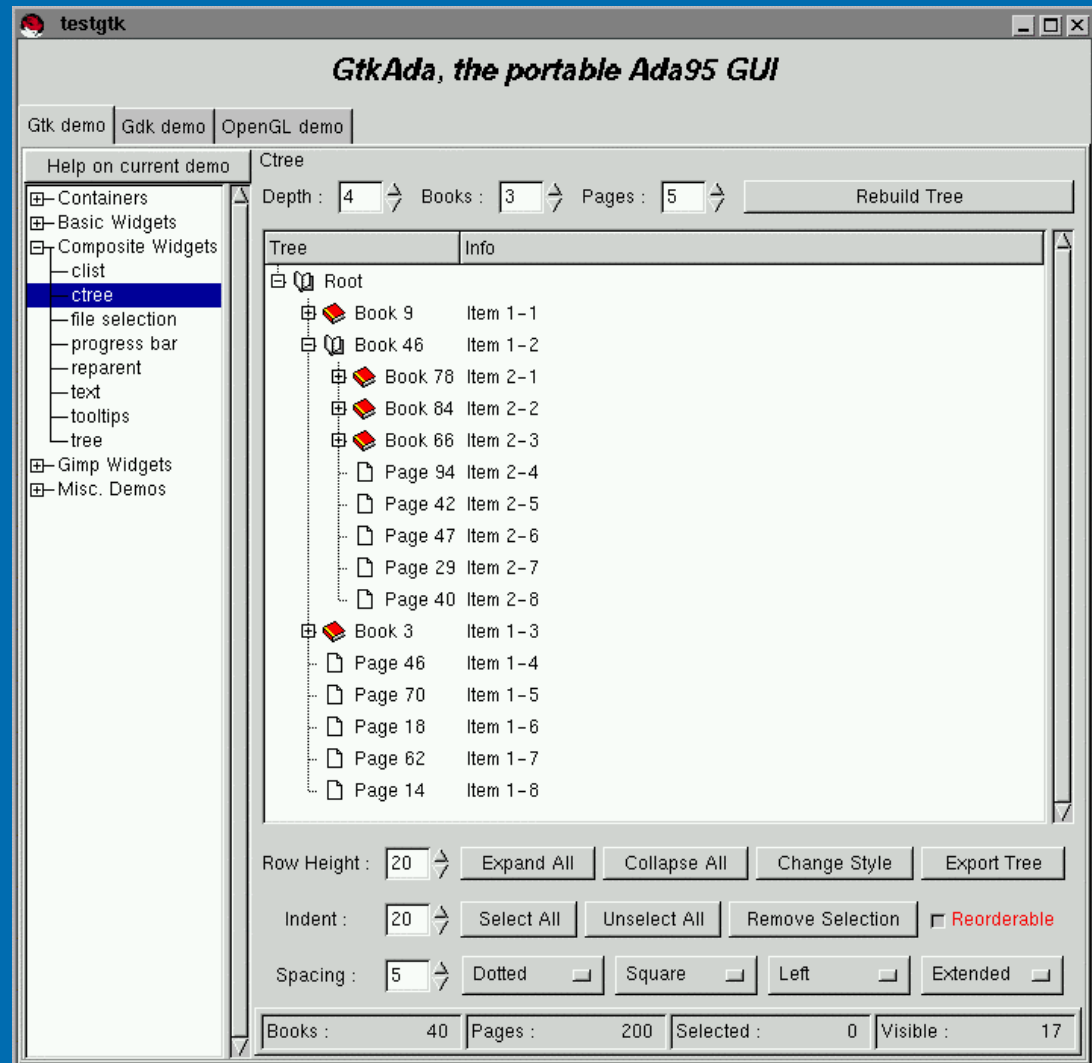

- ✓ **Event handling**
- ✓ **Drawing services**
 - **Lines, rectangles, ...**
 - **OpenGL (3D graphics)**
- ✓ **Style support**
- ✓ **Large set of widgets**

GtkAda - Widget set

- ✓ **Two types of widgets**
 - **containers and visual objects**
- ✓ **About 100 widgets are provided**
- ✓ **High-level widgets**
 - **notebook, text widget, tree, spin button, table, toolbar, ...**

GtkAda - Screenshots

✓ Ctree

GtkAda - Screenshots (2)

✓ OpenGL

Why Gtk+?

- ✓ **Portable**
- ✓ **Native**
- ✓ **Extensible**
- ✓ **Open Source**
- ✓ **Actively developed**
- ✓ **Thread-safe**

Why Gtk+? (2)

- ✓ High level widgets
- ✓ Easy to use scrolling capabilities
- ✓ Wide range of users
- ✓ Very powerful layout capabilities
 - Complete set of containers
- ✓ Powerful and easy to use GUI builder
- ✓ Easy to bind

The GUI Builder

- ✓ **Multi-language GUI builder**
 - **Language-independent save file (XML).**
 - **Code-generation specific to each language.**
 - **Dynamic loading of XML files**

Why GtkAda?

- ✓ **Compile time checks**
- ✓ **Real Object Oriented hierarchy**
- ✓ **Code readability**
- ✓ **Group most popular Gtk widgets**
- ✓ **Can create new types and extend widgets**
- ✓ **More extensive documentation**

GtkAda vs Gtk+: Example

```
#include <gtk/gtk.h>
```

```
void main (int argc,
           char *argv[])
{
  GtkWidget *window;
  GtkWidget *button;

  gtk_init (&argc, &argv);
  window = gtk_window_new (GTK_WINDOW_TOPLEVEL);
  gtk_container_set_border_width
    (GTK_CONTAINER (window), 10);
  button = gtk_button_new_with_label ("Hello World");
  gtk_container_add (GTK_CONTAINER (window), button);
  gtk_widget_show_all (window);
  gtk_main ();
}
```

Generic widget

Unique namespace

No dispatching

Typed Widget

```
with Gtk.Main; use Gtk.Main;
with Gtk.Button; use Gtk.Button;
with Gtk.Window; use Gtk.Window;
with Gtk.Enums; use Gtk.Enums;
```

```
procedure Hello is
  Window : Gtk_Window;
  Button : Gtk_Button;
begin
  Init;
  Gtk_New (Window, Window_Toplevel);
  Set_Border_Width (Window, 10);

  Gtk_New (Button, "Hello World");
  Add (Window, Button);
  Show_All (Window);
  Main;
end Hello;
```

Use clauses

Built-in OO

GUI Builder Support with GtkAda

- ✓ **Support built-in**
- ✓ **Takes advantage of object-oriented features.**
 - **Each widget generates its own code**
- ✓ **Generated sources**
 - **easy to read sources (generates new composite widgets)**
 - **sources can be modified and regenerated**

GtkAda: a complete GUI Solution

- ✓ **Portable**
- ✓ **Native**
- ✓ **Easy to use**
- ✓ **Safe**
- ✓ **Object Oriented**
- ✓ **Comes with a GUI builder**
- ✓ **Same look-and-feel**
